

EXPERT SERVICE FOR TURNTABLES

**Repair, Conversion
and Calibration for
ACUITAS motion tables**

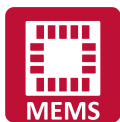

sustainable - fast - reliable

For more than 30 years we are the experts for all inertial applications and applied sensor technologies

Turntable Support & Maintenance – Now for ACUITAS Users!

In addition to turntables manufactured by iMAR and ACUTRONIC, iMAR also operates ACUITAS turntables for inertial sensor calibration, giving us extensive expertise also in their operation and maintenance.

With ACUITAS ceasing production and support in mid-2024, iMAR offers turntable maintenance services, including servo controller replacements, temperature control, sliprings, drive systems, and Acuitas Motion Control Software replacement.

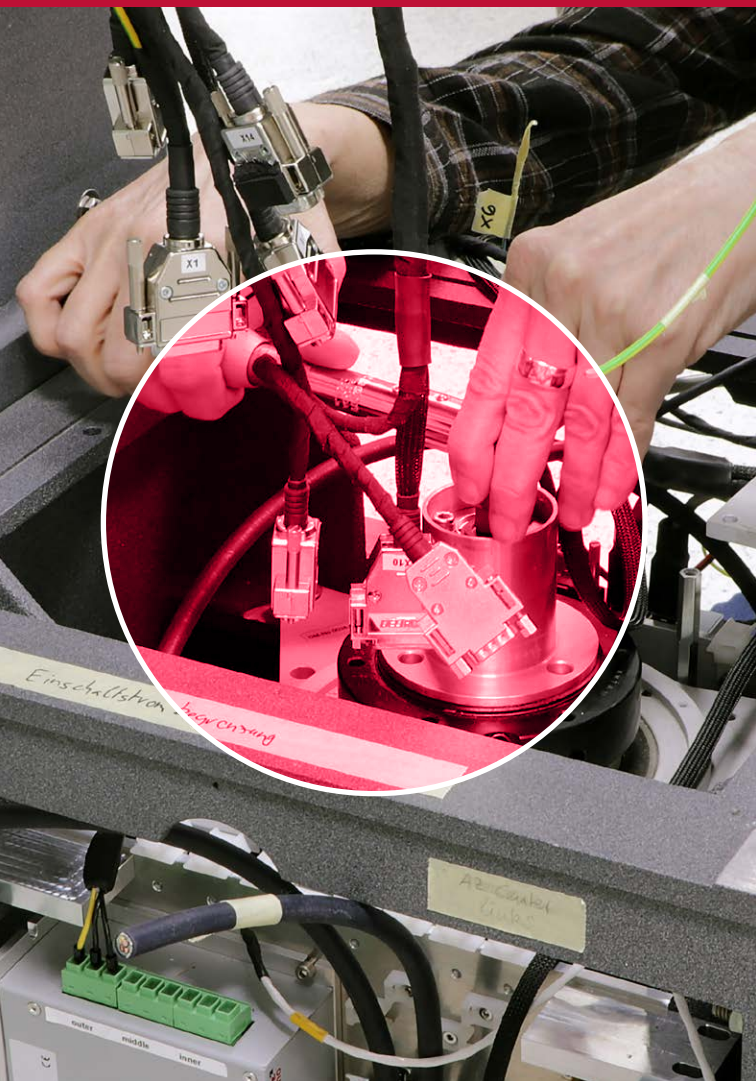

Need support? Contact us to discuss how we can help to maintain your ACUITAS turntable!
